DETAILED ACTION

*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-20**, drawn to a neighboring base station information update method classified in **class 370, subclass 335**.
  - II. **Claims 21-32**, drawn to an information management method for cell search in a handover-source base station classified in **class 370, subclass 331**.
2. The inventions are distinct, each from the other because the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention in the Group I discloses a neighboring base station information update method in a mobile communications system including a plurality of base stations that transmit perch channels and neighboring base station information, and a mobile station that receives the neighboring base station information, searches a perch channel in accordance with the neighboring base station to information, and receives the perch channel. The method is distinct from the invention in the group II, which discloses an information management method for cell search in a handover-source base station and phase different information between a long period spreading code of a common control channel from the handover-source base station and a long period spreading code of a common control channel from a handover-destination base station. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposed as indicated is proper.

3. If the Applicant(s) elect(s) Group I above, for example, the Applicant(s) would say, "I elect group I, which is drawn to claims 1-20". On the other hand, if the Applicant(s) elect(s) Group II above, for example, the Applicant(s) would say, "I elect group II, which is drawn to claims 21-32".
